

All-In-One Design Fits All Scenarios

The system comes with USB-C, Lightning, and 3.5mm TRS connectors, compatible with smartphones, cameras, and laptops, ideal for all scenarios.

3.5mm TRS connector

USB-C connector

iOS Lightning connector

Ultra-Long Battery Life

The system can be used for an incredible maximum of 30 hours.

TX: Approx. 10 hours
RX: Approx. 6 hours

Ready for Use Right Out of the Case

The TX and RX turn on automatically and pair with each other as soon as they are taken out of the charging case.

One Step to Turn on the Noise Reduction Function

To turn on the noise reduction and reduce unwanted noise, simultaneously press the "+-" buttons on the TX. This will make your sound clearer and cleaner.

Sound Like a Professional

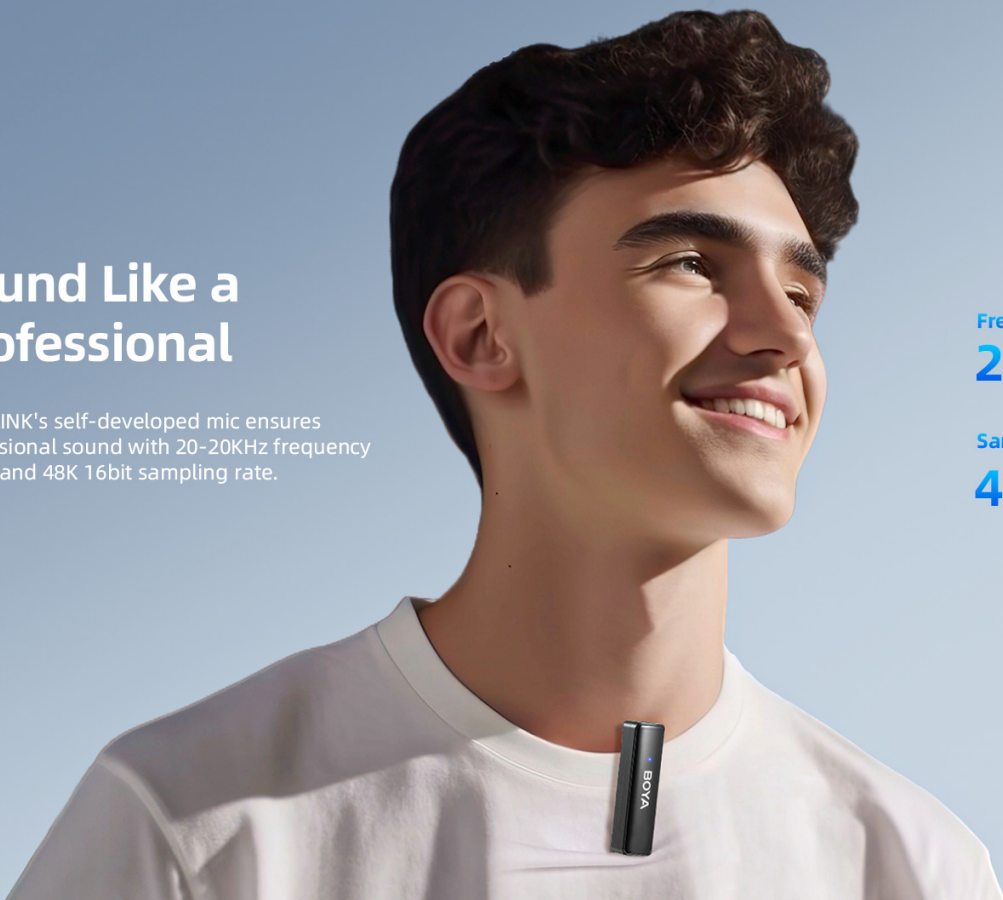

BOYALINK's self-developed mic ensures professional sound with 20-20KHz frequency range and 48K 16bit sampling rate.

Frequency Range

20-20KHz

Sampling Rate

48K 16bit

Charge Your Device While in Use

The RX's Type-C interface lets you charge your device and mic while using it for long periods, perfect for speeches, live-streaming, and filming.

* Please note that this function is limited to use with Lightning and Type-C connectors only.

Customize the Sound You Want

0-6 Level Gain Control

BOYALINK allows you to adjust the microphone gain level, ensuring optimal sound quality in any recording situation.

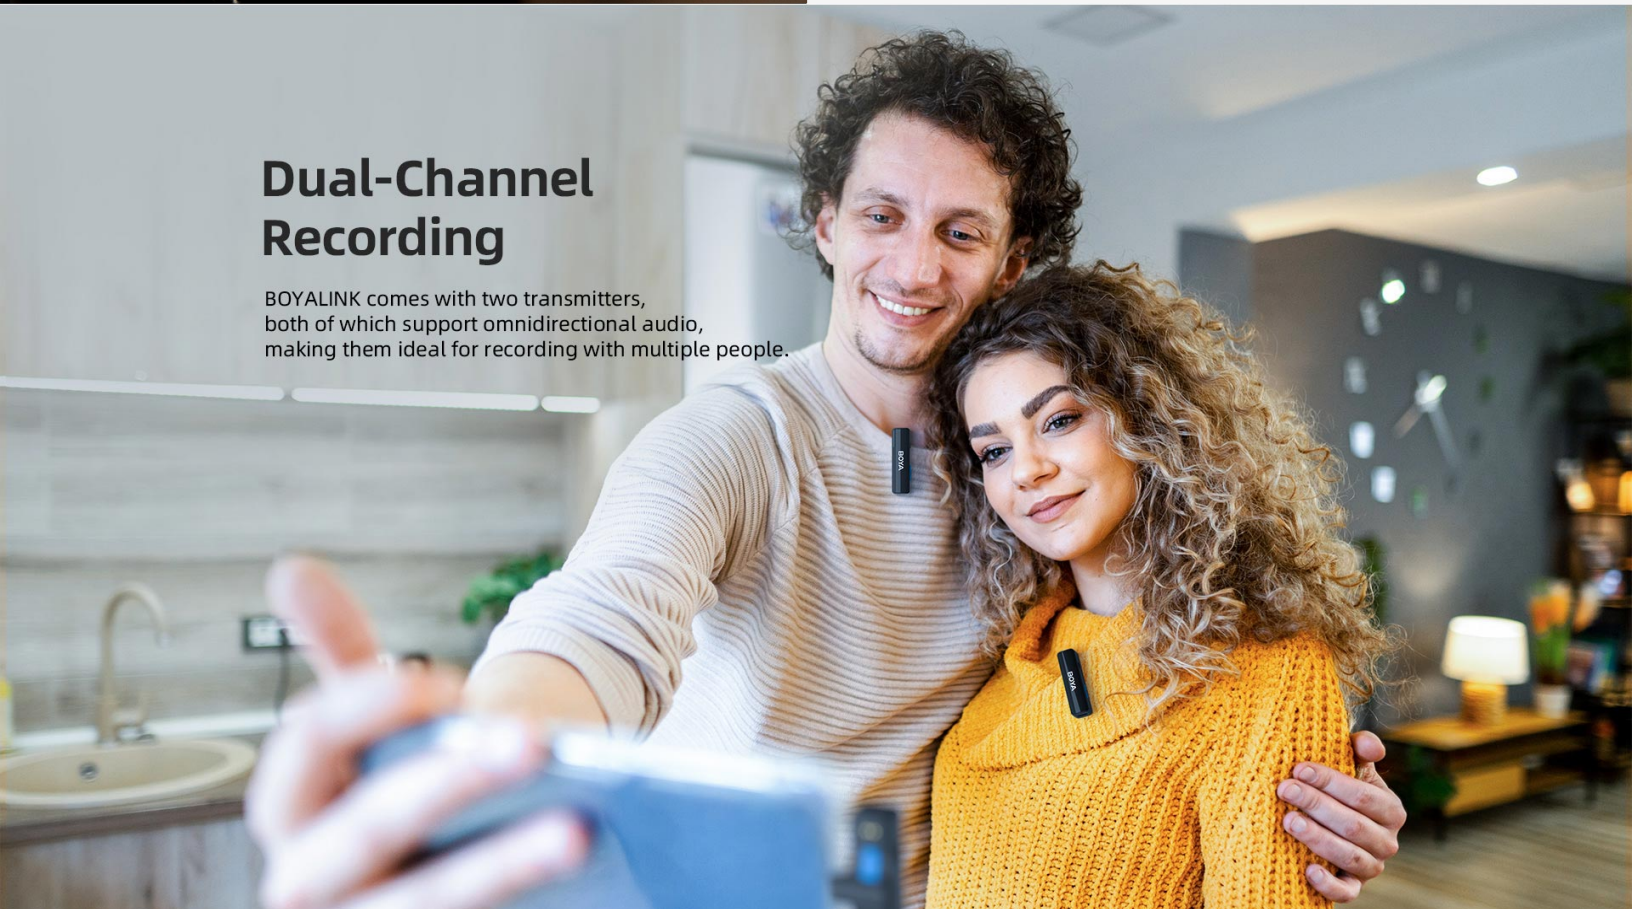

Selectable MONO and STEREO Functions

The mono and stereo functionalities of BOYALINK provide greater flexibility during post-production.

Dual-Channel Recording

BOYALINK comes with two transmitters, both of which support omnidirectional audio, making them ideal for recording with multiple people.

Automatically Frequency-Hopping Technology, Powerful Anti-Interference

BOYALINK utilizes advanced 2.4GHz wireless technology, which can automatically hop frequencies to capture clear sound in complex environments. With a 100m operating distance, it is ideal for long-range outdoor shooting.

User-Friendly Buckle Design

The BOYALINK RX features an upgraded buckle design, which makes it easier to connect the receiver to adapters.
