RECORDING LIVE MICROPHONE

- / Cardioid Pickup
- / High Resolution
- / Dynamic RGB Lighting

48 KHZ/16 BIT HIGH RESOLUTION

With a high sampling rate of 48 kHz/16 bit to achieve low-noise recording effects, it provides an excellent professional recording experience.

DYNAMIC RGB LIGHTING

Colorful dynamic RGB lighting effects, combined with a personalized laser-carved shape design, create a dazzling sound atmosphere.

GAIN AND MUTE BUTTONS

When encountering unexpected situations such as coughing, short press the button to mute. And the RGB light will always be on in purple to indicate that the mute is turned on.
