

MS-700ID(U) Series Addressable Manual Stations Installation Sheet

Mircom's MS-700ID(U) series provide manual fire reporting. These high quality, die-cast metal Intelligent Fire Alarm Manual Stations are available as single or dual-action devices with key resets with a permanently attached addressable module. The addressable manual station has DIL switches which allow for address setting. Pulling the handle initiates the operation of the addressable module. New York versions are equipped with a front guard plate.

All manual fire alarm stations shall be installed as per the specific requirements outlined in the UL/ULC codes, as well as all other applicable national or local codes. Final acceptance is subject to the local authority having jurisdiction.

MS-701ID(U), MS-702ID(U), MS-710ID(U), MS-701IDNY & MS-710IDNY

Models

MS-701ID(U): Single Stage Single Action

MS-702ID(U): Two Stage Single Action

MS-710ID(U): Single Stage Dual Action

MS-701IDNY: Single Stage Single Action New York Version

MS-710IDNY: Two Stage Single Action New York Version

Specifications & Dimensions

Switch Rating: 1 Amp @ 30 VDC
0.1 Amp @ 125 VAC

Address Setting

Segments 1–7 of the DIL switch are used to select the address of the module. Each of the seven segments must be set to '0' (ON) or '1' (OFF) using a small screwdriver or similar tool. A complete list of address settings is shown below.

DIL switch		DIL switch		DIL switch		DIL switch		DIL switch	
addr	setting 1234567	addr	setting 1234567	addr	setting 1234567	addr	setting 1234567	addr	setting 1234567
